Health Authority 3 - Vancouver Coastal

Statistical Profile of Aboriginal Peoples 2011

Aboriginal Peoples Compared to the non-Aboriginal Population

With Emphasis on Labour Market and Post Secondary Issues

Notes and definitions:

Random rounding. To ensure confidentiality, the values, including totals, are randomly rounded either up or down to a multiple of "5" or "10." To understand these data, you must be aware that each individual value is rounded. As a result, when these data are summed or grouped, the total value may not match the individual values since totals and sub-totals are independently rounded. Similarly, percentages, which are calculated on rounded data, may not necessarily add up to 100%.

Definitions. For definitions of terms used in this report please refer to http://www12.statcan.ca/nhs-enm/2011/ref/dict/index-eng.cfm. For information regarding incompletely enumerated Indian Reserves see http://www12.statcan.ca/nhs-enm/2011/ref/guides/99-011-x/99-011-x2011006-eng.cfm#a6.

From other income (%)	#	#	2.2	1.9	#	#	5.2	3.5

Because data on total income levels and income sources are not comparable between reserve populations and non-reserve populations, only the data for non-reserve Aboriginal and non-Aboriginal populations are included.

[1] Includes families/households without income.

[2] Low income cut-offs (LICOs) are defined as income levels below which a family is likely to spend 20 percentage points more of its income on food, shelter, and clothing than the average family. There are different cut-offs for different family and community sizes. Based on the 1992 Family Expenditure Survey, families spent 50% on average of their total income on necessities. The threshold was thus set in the income level where families spent 70% of their income on necessities. Cut-offs for other years are indexed by applying the corresponding Consumer Price Index (CPI) inflation rate to the cut-offs from the base year.
